

# INTERNATIONAL SEMINAR ON LIVESTOCK PRODUCTION AND VETERINARY TECHNOLOGY

## PROMOTING LIVESTOCK AND VETERINARY TECHNOLOGY FOR SUSTAINABLE RURAL LIVESTOCK DEVELOPMENT

### TIME AND VENUE

The seminar will be held on  
Wednesday-Friday, August 10<sup>th</sup>-12<sup>th</sup>, 2016  
in Inna Grand Bali Beach Hotel, Sanur, Bali - Indonesia, the paradise Island of Indonesia

### RATIONALE

Indonesian Center for Animal Research and Development (IAARD) under the Ministry of Agriculture is pleased to announce an International Seminar on Livestock Production and Veterinary Technology. The depletion of natural resources, emergence of new diseases and climate change are important factors that affect sustainable development of livestock, especially in rural area. Application of livestock and veterinary technologies may overcome these obstacles and enhance sustainability of livestock production. Therefore, livestock technologies that are produced should be based on optimizing the use of local resources including plants and animal germplasms, and utilization of agricultural by-products through crop-livestock system. Development of local breed of livestock and forages that is adaptive to climate change is important aspects to be addressed and introduced massively as well as veterinary technologies. More over in the era of Asean Economic Community, animal products competitiveness is highly dependent upon internal and external strategic environment that influence rural livestock development. These relevant and important issues are mainly discussed in this seminar. This seminar provides an excellent opportunity to share the expertise and experiences, also to identify challenges and explore innovative solutions for the benefit of all conference delegates.

### REGISTRATION

Registration fee is FREE

For paper submission and registration, see:

<http://peternakan.litbang.pertanian.go.id/intsem/>

Maximum length of full paper is 8 pages including table, graph and figure. Maximum two papers will be accepted for the same first author (please see the paper template).

Invited papers and supporting papers that are accepted and revised as suggested by reviewers will be published in the Proceeding. Papers that meet journal requirement will be published in Indonesian Journal of Animal and Veterinary Sciences (IJAVS) - ICARD scientific journal online.

Committee will provide seminar kit, meals during seminar, welcome dinner, cultural night, dinner, and field trip.

### DUE DATE

- Full paper : April 15<sup>th</sup>, 2016
- Acceptance : June 15<sup>th</sup>, 2016
- Revised paper acceptance and attendance confirmation : June 30<sup>th</sup>, 2016

### INVITED PAPERS

1. Dr. Muhammad Syakir (Director General of Indonesian Agency for Agricultural Research and Development) - Keynote speech, Indonesian policy for sustainability rural livestock development and increasing animal products consumption.
2. Prof. Dr. Tjeppey D Soedjana (Indonesian Agency for Agricultural Research and Development) - Competitiveness of Indonesian livestock production in the Asean Economic Community Market.
3. Dr. Harry Clark (Director of New Zealand Agricultural Greenhouse Gas Research Centre) - Estimation of greenhouse gases (GHG) emission and technologies to reduce GHG in the environment of rural areas.
4. Dr. Alan P Dargantes (Dean of the College of Veterinary Medicine, Central Mindanao University) - Improvement of veterinary technologies to strengthen viability of livestock sector in rural area.
