

Global Research Alliance (GRA) Animal Health & Greenhouse Gas Emissions Intensity Network Webinar 2 October 2017

A webinar to share the achievements of the **Animal Health and Greenhouse Gas Emissions Intensity Network (AHN)**; a United Kingdom (UK) led initiative of the Livestock Research Group (LRG) of the Global Research Alliance (GRA) on Agricultural Greenhouse Gases will take place on 2 October 2017

About the Network

The aim of the Network is to bring together relevant scientists/researchers from across the world to investigate links and synergies between initiatives to reduce livestock disease and Greenhouse Gas (GHG) emission intensities. The Network has gathered momentum since its inception in June 2013 and now consists of more than 100 members from across 30 countries. The key activities of the network include:

- Sharing information on relevant research activities
- Increasing international research capacity
- Pursuing joint activities with key partners

Webinar agenda

Monday 2 October 10:00 – 12:00 (GMT)

10:00 – 10:20 *Introduction and overview of the AHN (Ilias Kyriazakis, Newcastle University, UK)*

10:20 – 10:40 *Cattle health and GHG emissions in sub-Saharan Africa (Michael Macleod, SRUC, UK)*

10:40 – 11:00 Challenges and priorities for modelling livestock health and pathogens in the context of climate change (Seyda Özkan Gülzari, Nibio, NO)

11:00 – 11:20 Introducing the GRA Livestock Research group (Martin Scholten, Wageningen UR, NL)

11:20 – 11:40 UK Interaction with the GRA (Luke Spadavecchia, Defra, UK)

11:40 – 12:00 Concluding remarks (Ilias Kyriazakis, Newcastle University, UK)

Registration and further information

Please email Kate.Butts@adas.co.uk by **Wednesday 27 September**, to register your participation in the webinar and to receive the access link required to join the webinar.
