# Network aims

## Aims

1. **Develop the Peatlands network (Baltic counties, Indonesia)**
  2. **Develop the mitigation strategy document for boreal, temperate and tropical peatlands**
  3. **Bring together experimentalists, ecosystem and hydrology modellers and policymakers**
  4. **Combining vegetation ecology, hydrology and biogeochemistry**
-

## Current status of the network

---

- Finances applied for organizing a workshop (Norwegian internal sources)
    - Received for organizing costs, not for travel costs
    - Decisions received late June, organization pending due to summer vacations
-

## Action plan for next year

---

- **Teleconference meeting (Sept.-Oct.) to get better organized with new members**
  - **Decisions about the workshop → A small one in Norway late autumn 2017/early spring 2018?**
  - **Organize an EGU (European Geosciences Union) –session spring 2019, with a scope reflecting the aims of the network (experimental → modelling → policy)**
  - **Bring Indonesia into the network**
-
