About the GRA Croplands Database

This database of literature about greenhouse gases and croplands supports the GRA Croplands Group's mission of reducing greenhouse gas intensity and improving overall production efficiency of cropland systems. When completed the database will include literature from all 30+ GRA countries. This web site is a partnership between the GRA and Kansas State University and is being developed by Kansas State University Libraries.

Search & Browse

Use the search box on top to search for keywords. The available information in the database can be browsed by using the navigation options on top.

- I gather new citations to add to the database.
- Students categorized the database entries so that they are viewable on the public site. K-State Libraries Academic Services Department two student workers working on this when they have time.
- Train new students as they are hired.

- Using the web site Scholarly Open Access to check if articles were published in questionable journals. This web site no longer exists.
- Livia Olsen will be going on sabbatical for five months starting in the middle of December. Plans to make sure enough items are in the database for the students to work on while she is away.

- "GRA Croplands is running on AWS Amazon web services.
- Ubuntu 14.04

- If there are things that people would like to see added or if they find mistakes, they are welcome to contact me. Also, if there are other databases they think would be useful to search for items to add, I'm happy to receive suggestions
- Livia Olsen <livia@ksu.edu>
