

GRA-CRG MEMBER COUNTRY ACTIONS AND GROUP VISION

Republic of Korea

Sunil Lee

Update on key developments

- What new activities (projects, initiatives, etc) are there in your country that are relevant to the work of the CRG?
 - Development of nation-specific emission values (12 type) for crop land in agricultural sector
 - Development of soil carbon sequestration using biochar derived from agricultural by-product of biomass
- How could the CRG contribute to these activities?
 - Continuously share research results and policy directions among countries
- How can the CRG benefit from these activities?
 - Build a database over world

Longer term aspirations

- Does the CRG function well?
 - Regarding to the meeting progress, it is good to continuously pursue a new approach as usual.
- What could be improved?
 - The collaboration with other groups(IRG, LRG)
- Where do you see the CRG in 5 years time?
 - The current way of proceeding.
