

# GRA-CRG MEMBER COUNTRY ACTIONS AND GROUP VISION

SPAIN

OECC-MAGRAMA

# Update on key developments

- What new activities (projects, initiatives, etc) are there in your country that are relevant to the work of the CRG?
  - Research projects on the following subjects
    - Irrigation management, deficit irrigation, water balance
    - Plant breeding towards resistance to pest and diseases, drought, high temperatures.
    - Nutrients/crop fertilization, N use efficiency, N emissions, organic matter content.
    - Modelling
    - Soil erosion
    - Carbon sequestration: carbon sink in soil and crops.
    - Agricultural practices for carbon sequestration and/or emission reduction
    - Microbiota and GHG emissions

# Update on key developments

- How could the CRG contribute to these activities?
  - Sharing knowledge and methodologies
  - Networking
  - Capacity building
  - Information exchange
  - Identification of priorities
- How can the CRG benefit from these activities?
  - Best management practices development
  - Improving data bases
  - Harmonization of models, methods and data collection

# Longer term aspirations

- Does the CRG function well?
- What could be improved?
- Where do you see the CRG in 5 years time?
