Presentation to GRA Council
Tsukuba, 30 August, 2017

Capability building Research Groups' recommendations

- Understanding 'need' is critical and is especially important now due to the influx of new Members.
- Co-chairs will work with the Secretariat to develop an inventory of needs; your involvement is critical if we are to better deliver to your needs
- Resourcing is critical for the RGs to undertake capability development – too few Member countries are providing the resources necessary for all RGs to undertake capability building activities (LRG is an exception & acknowledges strong NZ support)
- Research groups working to develop a more integrated cross-group approach to capability building e.g. regional workshops covering all aspects of MRV
- You can help - facilitate the recruitment of experts & provide support; host meetings for GRA integrated workshops; provide fellowships to link capability development with flagship projects
