

A graphic on the right side of the slide, consisting of a grid of overlapping circles in a lighter blue shade, partially obscured by the text.

GLOBAL RESEARCH ALLIANCE

ON AGRICULTURAL GREENHOUSE GASES

Livestock Research Group meeting

15-16 May 2018

A background image of a field of golden crops, likely sorghum, under warm, golden light, possibly at sunset or sunrise.

**Working together to
engage internationally**

- Increased attention globally on livestock impact on climate change - the IPCC, UNFCCC, FAO, CCAC etc
- The LRG is uniquely placed:
 - Good understanding of country ambitions and also challenges
 - Research not just to advance the development of solutions but also to inform global and regional policy development
 - Provision of capability building support to countries to respond to the challenges, e.g. MRV, inventories

Breakout groups

Please divide into regional breakout groups: Africa, Americas, Asia-Pacific and Europe

Questions for discussion – please give specific examples if you can:

- What is already happening in your region to contribute to these international processes?
- How do you think the LRG and its research can help inform these processes?
- What else could the LRG do – either at the global or regional level?
- What specific actions are needed by countries/organisations to support the LRG to engage more actively?
- What will you be doing differently when you go home?
