ON AGRICULTURAL GREENHOUSE GASES

Livestock Research Group meeting

15-16 May 2018

**Working together to
identify shared interests:
BREAKOUT GROUPS**

Aim and instructions

During this session, we want to identify:

1. The range of livestock GHG issues and opportunities facing countries
2. The extent to which these are shared between countries

This will help us to develop a stronger and more collaborative LRG work programme.

Instructions:

Each delegate to provide a short (max. 5 minute) update to your breakout group on one GHG-related issue in your country. Either:

- a) Something your country is excited about, how it happened and how others could get involved or replicate; OR
- b) A specific challenge your country is grappling with and wants to learn from others with similar experiences
