

# Component – Peatland Management Network

GLOBAL  
RESEARCH  
ALLIANCE

ON AGRICULTURAL GREENHOUSE GASES

---

## Current members

# Network aims

## Aims

1. **Expand the network (South-East Asia, USA, Brasil, Baltic countries)**
  2. **Bring together biogeochemists, agronomist, vegetation ecologists, hydrologist**
  3. **Raise awareness of stakeholders on peatland management**
  4. **Map current status (peatland management, i.e. activity data, in various countries)**
  5. **Develop GHG mitigation strategies for boreal, temperate and tropical peatlands**
  6. **Organize/participate in scientific/stakeholder events, where organic soils and their use is relevant**
-

## Activities 2017-2018

---

- Workshop in Norway. The network organized a workshop “Sustainable Management of Northern Peatlands” in March 2018 in Norway together with MYR and PeatWise –projects. Local stakeholders, Norwegian and Northern European Research teams participated.

- EGU Session. The network organized an EGU session titled “Environment-friendly management of organic soils and paludiculture - from innovation to implementation” in April 2018.
-

# Plan for 2018-2019

---

## Events

- Stakeholder workshop in Norway (spring 2019)
- Suggested EGU session “Peatland management” jointly with Global Peatlands Initiative, Greifswald Mire Center, Thünen Institute, RePeat- and PeatWise - projects
- Participation in International Conference on Agricultural GHG emissions and Food Security (Berlin, Sept 2018) and the conference of International Peat Society (Rotterdam, Sept. 2018)

## Other activities

- Expand to South-East Asia (Indonesia/Malesia)/ Baltic countries
  - Collaboration with MICCA programme
  - Joint activities with Global Peatlands Initiative (either late 2019 or 2020)
  - Participation in stakeholder questionnaire of the PeatWise -project
-
