

## Babak Darabighane, Iran

### CLIFF-GRADS Project:

Mitigation of methane emissions and capturing the effects of diet on GHG emissions from Finnish dairy production system.

### Home University and PhD:

University of Mohaghegh Ardabili, Ruminant nutrition.

### Host Institute and Supervisor:

Natural Research Institute Finland (Luke), Dr Ali-Reza Bayat and Dr Ilma Tapio.

### About me:

I am generally a positive, content and easygoing person and I do not have any difficulty adapting to new situations, which helps me to work with different research groups and stay far from home to conduct farm experiments. I am interested in doing research because I get to know the challenges and can get a better understanding of the facts.

### My favorite quote:

*"The secret of getting ahead is getting started" (Mark Twain).*
