

Glory Edwards, Nigeria

CLIFF-GRADS Project:

The greenhouse gas emission potential of Sustainable Rice Platform (SRP) practices for sustainable rice cultivation.

Home University and PhD:

Wageningen University, PhD in Environmental Sciences.

Host Institute and Supervisor:

International Rice Research Institute, Vietnam. Project leader: Bjoern Ole Sander and Research supervisor: Bui Tan Yen.

About me:

We can have it all when we play our cards well – food security, climate adaptation, as well as greenhouse gas mitigation. I am exploring the triple win in life. I am passionate about education. I love to inspire people, teaching them life skills and practical strategies to reach their highest potential; particularly women, who can be #WomanAndMuchMore.

My favorite quote:

“Win within, win with ‘out’”
