

Juan Vargas Martinez, Colombia

CLIFF-GRADS Project:

Integrating mitigation strategies to decrease methane emissions of dairy cows in pastoral systems.

Home University and PhD:

University of Florida, Animal Science.

Host Institute and Supervisor:

Instituto de Investigaciones Agropecuaria de Chile (INIA), Camila Muñoz.

About me:

I have related to animal production and the environment since I was a child. For this reason, I enjoy nature and outdoor activities. Furthermore, I love to read books and spend time with my family.

My favorite quote:

"Nobody does not demand that we know...We have to know, that's all"
