

Ngaiwi Mary Eyeniyeh, Cameroon

CLIFF-GRADS Project:

Tracing the contribution of deep roots to soil carbon sequestration using isotopic tracers.

Home University and PhD:

University of Florida, Agronomy.

Host Institute and Supervisor:

Environment Centre Wales, Bangor University, UK; Dr. Davey Jones.

About me:

I have always cared about producing food to support the demand of the growing population. As an agricultural scientist, I believe that is our duty to develop sustainable practices to mitigate environmental damages while maintaining the efficiency of agricultural systems.

My favorite quote:

"You never fail until you stop trying"
