

## Pénélope Gnavo, Benin

### CLIFF-GRADS Project:

Evaluating environmental impacts of the beef cow-calf system by the life cycle assessment method in Thailand.

### Home University and PhD:

University of Parakou, Life cycle assessment of sedentary cattle farming systems in Benin.

### Host Institute and Supervisor:

Bureau of Animal Husbandry and Genetics Improvement, Department of Livestock Development, Thailand. Kalaya Boonyanuwat.

### About me:

I have always been drawn to the beautiful landscapes nature offers and I want to preserve them by contributing to environmental degradation mitigation. During my spare time, I like to find out about the latest technological innovations in the world.

### My favorite quote:

*“Act as if what you do makes a difference. It does” (William James).*
