

## Primitiva Mboyerwa, Tanzania

### CLIFF-GRADS Project:

Assessing Impact of Cover Crop on Nitrogen Use Efficiency and Greenhouse Gas Emissions Project.

### Home University and PhD:

Haramaya University, Climate Smart Agriculture and Biodiversity Management (majoring in Soil and Water management).

### Host Institute and Supervisor:

USDA-ARS Soil and Water Conservation Research Unit, Pendleton, USA, Dr. Hero Gollany.

### About me:

I do not have any difficulty making friends or adapting to new environments. This helps me to stay away from my family and to be able to conduct field experiments, trainings and workshops, which sometimes last for couple of months. I am ready to learn new innovations and to apply them accordingly. Facing new challenges is something that makes me motivated.

### My favorite quote:

*"The nation that destroys its soil, destroys itself"*
