

Sruthi P, India

CLIFF-GRADS Project:

Post-harvest management in rice paddy fields for carbon budget optimization.

Home University and PhD:

University of Calicut, Application of crop simulation models for water and nutrient management on growth and productivity of rice under different climatic scenarios.

Host Institute and Supervisor:

Institute of Agrifood Research and Technology (IRTA), Dr. Maite Martínez-Eixarch.

About me:

I have always been socially conscious and passionate about understanding climate change and mitigating its effect on agriculture. Due to this, my research work is focused on finding better management practices for crops, with the help of Crop Simulation Models, Carbon sequestration and Plant physiology techniques.

My favorite quote:

“When you want something, all the universe conspires in helping you to achieve it”
