

Ngaiwi Mary Eyeniyeh, Cameroon

CLIFF-GRADS Project:

Implementing sustainable agricultural and livestock systems for simultaneous targeting of forest conservation for climate change mitigation (REDD+) and peace-building.

Home University and PhD:

University of Buea, Agricultural Economics.

Host Institute and Supervisor:

CIAT, Palmira, Colombia, Dr Augusto Castro.

About me:

I socialise 100% but am very conscious of my duties, and have always been passionate about climate change issues and if it goes the same for a man like a woman also on policy matters when it comes to Agriculture and the environment. This makes me interested in climate change and what can be don't to ameliorate future impacts while adapting to the present.

My favorite quote:

"Keep your face always toward the sunshine and shadows will fall behind you"
