

Abdoulaye Tyano, Burkina Faso

CLIFF-GRADS Project:

Agricultural management's potential effect on the soil carbon sequestration at national level.

Home University and PhD:

Nazi Boni University; Ecosystem services of shrubs in fields: Ecological intensification of soils and carbon stock assessment.

Host Institute and Supervisor:

National Institute of Agricultural Research (INIA), Spain;
Dr. Jose L. Gabriel.

About me:

I'm a nature lover which is why I started doing environmental studies. I am interested in the reduction of greenhouse gas emissions and their sequestration by agrosystems. I feel particularly fortunate to be able to participate in studies with an international team. This will undoubtedly contribute to my capacity building. During my spare time I like to listen to interviews with popular personalities or slam music.

My favourite quote:

"Work removes from us three great evils: boredom, vice and need" - Voltaire

RESEARCH PROGRAM ON
**Climate Change,
Agriculture and
Food Security**
