

## Addis Tadesse Tekle, Ethiopia

### CLIFF-GRADS Project:

Modelling adaptation co-benefits of mitigation in regional farming systems.

### Home University and PhD:

Haramaya University, Ethiopia; Doctor of Philosophy in Agronomy.

### Host Institute and Supervisor:

Columbia University, USA; Dr. Cynthia E. Rosenzweig and Dr. Carolyn Mutter.

### About me:

I have always been interested in learning how things work, but my time as an undergraduate opened my eyes to the enthusiasm and wider benefit of science. I have done different research activities in my career and master's study that inspired me to take up the challenges of a PhD. I have enjoyed my academic work so far, but I really feel I've got more to offer as an independent researcher. I am also passionate about crop modelling and climate change adaptation to mitigate greenhouse gas emissions. As a researcher, I have worked with international projects CIMMYT and IFAD that help me to develop strong teamwork capability. I would love to combine my studies here with the knowledge and experiences that will be gained from international scientists to produce high impact results. In my spare time, I enjoyed visiting historical places; reading some fiction, and playing football.

### My favourite quote:

*"Agriculture is challenged to provide food security and environmental security ..."* - Dr. Cynthia E Rosenzweig, NASA GISS.

RESEARCH PROGRAM ON  
**Climate Change,  
Agriculture and  
Food Security**
