

Beatriz Bizzuti, Brazil

CLIFF-GRADS Project:

Energy use efficiency of dairy cows fed by-products in early lactation.

Home University and PhD:

Centre for Nuclear Energy in Agriculture – University of São Paulo, Brazil; Biology in Agriculture and Environment, Master of Science.

Host Institute and Supervisor:

National Institute of Agricultural Technology (INTA), Argentina; Dr. Patricia Ricci.

About me:

I am passionate about nature. The harmony between people and the environment is necessary, so I try to contribute to this in my way. For this reason, I've begun to study sustainable agriculture production. I am motivated to learn about new cultures and places as well as developing the sustainability of the food sector. In my spare time, I enjoy traveling with my family, making crafts, taking care of my pets, and observing nature, as well as doing outdoor activities.

My favourite quote:

"Who's to say what's impossible? Well they forgot, this world keeps spinning and with each new day I can feel a change in everything (...)" - Upside Down by Jack Johnson

RESEARCH PROGRAM ON
**Climate Change,
Agriculture and
Food Security**
