

## Endale Balcha, Ethiopia

### CLIFF-GRADS project:

Directed evolution of rumen microbial cultures towards the identification and stimulation of electron sinks alternative to methanogenesis.

### Home University:

Mekelle University, Ethiopia; Climate and Food Systems.

### Host institute and Supervisor:

National Institute of Agricultural Research (INIA), Chile; Dr. Emilio M. Ungerfeld.

### About me:

I am eager to explore the interactions of climate change with the natural environment, natural resources and human environment. I am particularly interested to engage with projects that enhance livestock productivity in a way that ensures environmental sustainability. I want to be an active participant in the effort to mitigate greenhouse gas emissions from the agriculture sector. We should meet our demand without compromising the ability of future generations to meet their demand!

### My favourite quote:

*“What is the use of a house if you haven’t got a tolerable planet to put it on?” - Henry David Thoreau*
