

Flavia Olguin, Argentina

CLIFF-GRADS Project:

Mitigating greenhouse gas emissions from coffee production systems through shade management.

Home University and PhD:

National University of La Plata, Argentina; Ecophysiology of native forest species of the Paranaense Rainforest for the establishment of mixed plantations and enrichment of degraded forest.

Host Institute and Supervisor:

Jimma University, Ethiopia; Dr. Abebe Nigussie.

About me:

I am a lover of nature, travel and photography. I love travelling new paths, learning about new cultures and places. I get to work in and study forests and that is what I like most about my profession. I am really happy, CLIFF-GRADS is a new adventure!

My favourite quote:

"If I knew that the world ends tomorrow, I, even today, plant a tree" - MLK

RESEARCH PROGRAM ON
**Climate Change,
Agriculture and
Food Security**
