

Habtamu Degefa Debelie, Ethiopia

CLIFF-GRADS Project:

Greenhouse gas emissions from extensive livestock systems under Mediterranean conditions: On-site nitrous oxide (N₂O) quantification and carbon budget estimations by LCA.

Home University and PhD:

Hawassa University; Climate change and bio-energy development.

Host Institute and Supervisor:

Research Center for the Management of Environmental and Agricultural Risks (CEIGRAM), Spain; Professor Alberto Sanz Cobeña.

About me:

Growing up in the rural areas of Adaba, South Oromia, where agriculture and settlement is progressing and expanding to the regionally significant natural forest made me realize the importance of studying environmental science to improve my knowledge about the human - nature interface and its interaction for landscape restoration. Also, I enjoy spending spare time with my children, family, friends, managing plants and participating in social events.

My favourite quote:

"Infinite striving to be the best is man's duty; It is its own reward. Everything else is in God's hands." - Mahatma Gandhi

RESEARCH PROGRAM ON
**Climate Change,
Agriculture and
Food Security**
