

Haftay Hailu Gebremedhn, Ethiopia

CLIFF-GRADS Project:

Co-design and dissemination of options to mitigate the impact of livestock on climate change.

Home University and PHD:

Haramaya University, Climate smart agriculture and biodiversity conservation.

Host Institute and supervisor:

French Agricultural Research Centre for International Development (CIRAD), France; Dr. Eric Vall and Dr. Paulo Salgado.

About me:

I like reading, appreciating and contemplating nature and interacting with other cultures and international communities. In my spare time, I enjoy spending quality time with my family.

I am passionate to supported participatory action research and trainings on topics related to the measurement and management of greenhouse gas emission and removals in pastoral and agro-pastoral ruminant farming system as it is highly important to reduce global greenhouse gas emissions but in Africa pastoral land use system is still poorly understood and there is lack of enough information. This scholarship would thereby help me enhance my research and educational capacity and improve my connection and exposure to the international community with regards to knowledge of pastoralist management systems contributing to climate change mitigation and increase economic development.

My favourite quote:

"Great minds discuss ideas, average minds discuss people" - Anonymous

RESEARCH PROGRAM ON
**Climate Change,
Agriculture and
Food Security**
