

Moyosore Joseph Adegbeye, Nigeria

CLIFF-GRADS Project:

Validation of active principles, from trees and shrubs implemented as an integrated strategy to rumen ecosystem and its ecosystem services in Cundinamarca-Colombia dairy system.

Home University and PhD:

Federal University of Technology Akure, Nigeria; Influence of chronomanagement on West African dwarf goat.

Host Institute and Supervisor:

Agrosavia, Colombia; Dr Olga Lucía Mayorga Mongollón.

About me:

I enjoy working with beautiful minds. I love traveling and experiencing new environments. In my spare time I play football, football manager and WHOT. I am passionate about contributing to ruminant production while reducing its GHG emission. I am interested in the use of sustainable resources such as plant-based resources and time management in managing ruminant production, rumen ecosystem and reducing GHG emissions of the ruminant industry in developing countries.

New knowledge I obtain from this experience can be integrated into my established knowledge and used to recommend application. I am also interested in finding new ways in which established knowledge can be more efficiently applied.

My favourite quote:

"If it be possible, as much as it lies in you, live peaceably with all men" - book of Roman by Apostle Paul.

RESEARCH PROGRAM ON
**Climate Change,
Agriculture and
Food Security**
