

Priscila Matos, Brazil

CLIFF-GRADS Project:

Technologies and practices to increase carbon sequestration in integrated crop-livestock system on humid tropical savannah.

Home University and PhD:

Federal Rural University of Rio de Janeiro, Brazil;
Agronomy – Soil Science.

Host Institute and Supervisor:

Embrapa Rice and Beans, Brazil; Dr. Beata Eموke Madari.

About me:

I enjoy socializing and sharing experiences with people, having a coffee, interacting with nature and sometimes listening to songs make my day happier. I like to work in a team involved at the same that I can work independently, I am dedicated and persistent to fulfil tasks assigned to me.

I am feeling motivated and so grateful for this opportunity to work with the CLIFF-GRADS team. I believe that with this training I will become more able to contribute to the research in my country on the topic of technologies and practices to increase carbon sequestration.

My favourite quote:

"You must take your place in the circle of life. Remember who you are!" - The Lion King by Mufasa.

RESEARCH PROGRAM ON
**Climate Change,
Agriculture and
Food Security**
