

Sandra Patricia Loaiza Mera, Colombia

CLIFF-GRADS Project:

Methane (CH₄) mitigation in rice systems - from field research to supply chain initiatives.

Home University and PhD:

Pontificia Universidad Javeriana Cali, Colombia;
Engineering doctorate and applied sciences.

Host Institute and Supervisor:

University of California, Davis, USA; Professor Cameron Pittelkow and Ngonidzashe Chirinda.

About me:

I'm from Colombia. All my education has been done in my country. I like to travel and learn new things every day. I think life is about opportunities, and to make the most of them. I like agriculture, and I am also a small rice farmer. I enjoy working with farmers of my country by helping them to understand the impact of the greenhouse gas emissions from the soil of the cropping systems. I would like to help promote the conservation of resources without affecting farmers economically or their feed needs.

My favourite quote:

"If you can dream it you can do it" - Walt Disney

RESEARCH PROGRAM ON
**Climate Change,
Agriculture and
Food Security**
