Capacities to track change in emissions do not match with ambitions

Agroforestry in the NDCs

# of countries explicitly reporting agroforestry C stock changes	2/50
# of countries reporting C stock change in croplands remaining croplands	15/50

MFAT-MPI inventory support initiative

Objectives:

- Improved national GHG inventories
- Effective participation in global science, innovation & technology partnerships
- Low-emission options identified

Lines of support:

- 1) Capability building (training & research grants)
- 2) Improved GHG inventories
- 3) Measurement hubs
- 4) Regional research projects
- 5) Pilot mitigation activities

6 S & E African countries, 6 SE Asian countries

S & E Africa	SE Asia
Kenya: Assessing priority needs	Cambodia: In early discussions
Malawi: In early discussions	Indonesia: Assessing priority needs
Uganda: Tier 2 inventory workplan agreed	Philippines: In early discussions
Zambia: Tier 2 inventory workplan under discussion	Vietnam: Assessing priority needs
Zimbabwe: Tier 2 inventory workplan agreed	TBC
TBC	TBC

Types of activity under discussion in the short-term

- **Tier 2 livestock GHG inventory compilation** (capacity building, institutional arrangements)
- **Identification of priority emission sources and mitigation options**
- **Support to activity data monitoring systems for mitigation actions & inventories**
- **Training and research grants**
